KYC and Customer Onboarding Policy

Document ID: CO-004 | Owner: Compliance | Effective date: 2025-11-01 | Version 1.0

This internal policy defines the minimum Know Your Customer requirements for onboarding and monitoring individual customers. It is a fictional policy created for training purposes.

1. Required Identification

- Valid national ID or passport
- Proof of address dated within the last 3 months, such as a utility bill
- Source of income declaration
- Tax identification number where applicable

2. Customer Risk Rating

Every customer is rated Low, Medium or High risk at onboarding, based on factors such as occupation, geography, product, and expected activity.

Customer files must be reviewed periodically according to the risk rating.

Risk rating	Review frequency
Low	Every 3 years
Medium	Every 2 years
High	Every year

3. Politically Exposed Persons

Politically Exposed Persons (PEPs) and their close associates are always rated High risk. Opening an account for a PEP requires approval from both the Head of Compliance and a member of senior management.

Enhanced due diligence for High risk customers includes verifying the source of wealth and obtaining senior management approval before the relationship starts.

4. Sanctions Screening

All customers are screened against sanctions and watchlists at onboarding and daily thereafter. The bank does not onboard customers who are residents of, or have their main business in, sanctioned jurisdictions.

5. Remote Onboarding

Customers may open an account through the mobile app using a liveness check and verification of the national ID against the civil registry.

Accounts opened remotely are limited to Tier 1 status with a balance cap of EGP 50,000 until the customer completes in-branch verification.

6. Incomplete KYC

If required KYC documents are not completed within 30 days of account opening, the account is restricted to incoming transactions only until the documents are provided.
